WHEN TREATING ALZHEIMER'S DISEASE, COMBINATION THERAPY MAY PROVIDE THE GREATEST BENEFIT

WHILE YOU MAY BE AWARE THAT F-D-A-APPROVED TREATMENTS ARE AVAILABLE FOR PATIENTS WITH ALZHEIMER'S DISEASE, DID YOU KNOW THAT USING TWO CLASSES OF MEDICATIONS IN COMBINATION MAY PROVIDE THE GREATEST BENEFITS? A 2004 STUDY IN THE JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION FOUND THAT COMBINATION THERAPY PROVIDES GREATER COGNITIVE, FUNCTIONAL AND BEHAVIORAL BENEFITS TO PEOPLE WITH MODERATE TO SEVERE ALZHEIMER'S DISEASE THAN TREATMENT WITH ONE CLASS ALONE. MORE THAN FOUR MILLION AMERICANS HAVE ALZHEIMER'S DISEASE, AND EXPERTS PREDICT THAT THE NUMBER COULD DOUBLE IN THE NEXT TWENTY-FIVE YEARS. WITH A DIAGNOSIS, PEOPLE CAN BEGIN TREATMENT THAT MAY SLOW THE PROGRESSION OF SYMPTOMS. IF YOU SUSPECT A LOVED ONE HAS ALZHEIMER'S DISEASE, TALK TO YOUR DOCTOR. IF YOUR LOVED ONE HAS ALREADY BEEN DIAGNOSED WITH ALZHEIMER'S, SPEAK WITH YOUR DOCTOR ABOUT THE POTENTIAL BENEFITS OF COMBINATION THERAPY. FOR MORE INFORMATION ABOUT ALZHEIMER'S DISEASE, PLEASE VISIT [WWW--DOT--ALZHEIMERS-ONLINE--DOT--COM](http://WWW.DOT.ALZHEIMERS-ONLINE-DOT.COM).
