HINTS FOR HOMEOWNERS

TODAY'S HOMES ARE TIGHTER AND MORE ENERGY EFFICIENT. HOWEVER, IF NOT PROPERLY VENTILATED, TRAPPED MOISTURE AND HUMIDITY CAN LEAD TO MOLD AND MILDEW, WHICH CAN CAUSE ALLERGIC REACTIONS AND OTHER MEDICAL PROBLEMS. SEVERAL NEW BATH FAN MODELS FROM BROAN AND NUTONE MAKE CONTROLLING EXCESS MOISTURE AND HUMIDITY IN THE BATHROOM EASY AND EFFICIENT. A HUMIDITY-SENSING FAN IS A GREAT OPTION FOR HOMEOWNERS. ONCE THE FAN SENSES A RAPID RISE IN HUMIDITY, IT WILL AUTOMATICALLY TURN ON TO EXHAUST EXCESS MOISTURE AND TURNS OFF ONCE THE JOB IS DONE. SINCE THIS FAN IS PART OF THE ULTRA SILENT SERIES, HOMEOWNERS CAN REST ASSURED THAT THE FAN IS QUIET. IT'S ALSO ENERGY STAR QUALIFIED, WHICH HELPS YOU SAVE MONEY ON YOUR UTILITY BILLS. ANOTHER WAY TO IMPROVE YOUR BATHROOM VENTILATION IS TO UPGRADE YOUR EXISTING BATH FAN WITH THE NEW BATH FAN UPGRADE KIT. THE KIT ALLOWS YOU TO REPLACE THE MOTOR AND GRILLE WITHOUT REPLACING THE HOUSING. TO SEE IF THE KIT COULD WORK FOR YOU VISIT W-W-W--DOT--B-R-O-A-N--DOT--COM OR W-W-W--DOT--N-U-T-O-N-E--DOT--COM.
